Education

Singapore Institute of Technology – DigiPen Institute of Technology (SIT – DP) August 2022 – May 2026

- BSc in Computer Science in Interactive Media and Game Development (Honours with Distinction)

Ngee Ann Polytechnic (NP) April 2017 – April 2020

- Diploma in Information Technology

Projects

Where's Your Ticket? (Capstone Project)
Sole Developer May 2025 – April 2026

- Developed a 2D simulation game in Unity using C#, modelling realistic IT helpdesk workflows
- Designed and implemented core gameplay systems including ticket generation, handling, and resolution
- Managed development using a sprint-based workflow in Jira for task tracking and backlog management

Snookerina (SIT – DP Software Engineering Project 5/6) September 2024 – April 2025
Serialization and Reflection Programmer

- Collaborated in a 13-person team to build a custom C++ game engine and 3D third-person action game
- Designed and implemented a serialization and reflection system using *rapidjson* and *Run Time Type Reflection* (RTTR) libraries, enabling designers and scripters to independently persist and reload scripting data, a pattern applicable to data-driven backend architecture

Head Hunter (SIT – DP Software Engineering Project 3/4) September 2023 – April 2024
Technical Lead

- Led an 8-person cross-disciplinary team using weekly Scrum meetings and a maintained Technical Design Document, delivering a custom C++ game engine and 2D action game from architecture through implementation
- Implemented component-based architecture, serialization, BFS Algorithm, and various gameplay systems

Work Experience

Sea Limited May 2025 – April 2026
Junior IT Analyst, Corporate IT (Helpdesk)

- Reduced first-level ticket volume by authoring knowledge-base content that powered an internal helpdesk chatbot, automating responses to recurring employee queries
- Resolved hardware, software, and network issues via systematic root-cause troubleshooting and CLI-based diagnostics, maintaining consistent first-contact resolution
- Ranked top 3 in team CSAT scores (Aug–Oct 2025) managing end-to-end IT asset lifecycle (inventory, deployment, new-hire provisioning, and vendor coordination) via an in-house ticketing system
- Sustained service-quality standards through a cross-site transition between two offices, adapting workflows to distinct team structures and user bases with no disruption to SLA performance

CrimsonLogic Pte Ltd March 2019 – September 2019
Business Analyst Intern

- Authored functional and interface specifications and designed screen mock-ups, translating stakeholder requirements into actionable technical documentation
- Executed System Integration Testing (SIT) and User Acceptance Testing (UAT), and documented test results

Skills

- Programming Languages: C, C++ (Proficient); C#, Python (Intermediate); TypeScript, JavaScript (Basic)
- Web Development: Node.js, Next.js, React.js, NestJS, REST APIs, HTML, CSS (Basic); Jest, Playwright (Exposure)
- Databases & Cloud: PostgreSQL, Microsoft SQL Server, Firebase (Basic); AWS: S3, ECS, RDS, Secrets Manager (Exposure)
- Tools: Git, GitHub (Proficient); GitLab (CI/CD), Docker, Jira, Linux/Bash (Basic); Terraform (Exposure)
- Game Engines: Unity (Intermediate); Unreal Engine (Basic)
- Languages: English and Mandarin (Written & Spoken)
